| 🔧 MySQL | 🔧 Ajax / Json | 🔧 Rest API |

iRest by Introps

Handle 500+ orders per day

“iREST” is a hybrid solution to all who are struggling with normal POS systems, outdated restaurant systems with technical difficulties. This premium all-in-one restaurant system allows the restaurant staff to function in a methodical way from table reservation to End Customer service, while restaurant managers and restaurant owners can have a tight control over daily restaurant operations.

iRest simply automate your restaurant giving easier tools to quickly and accurately place orders, manage daily transactions, stock details, managing the daily/ weekly/ monthly requirement according to the menus and recipes, managing bar with separate inventory (bottle wise and shot wise) & invoicing mechanism. Easiness of operating restaurant system will lead everyone in your operation to better serve your customers with 100% satisfaction. This is exactly the reason that several thousands of restaurants have chosen “iREST” to run their restaurant.

Key Components

- ✓ Hybrid Sales Terminals – POS (Simple / Table Based)
